

# More Able in Music

## KS3

During Key Stage 3 all performance and composition tasks have appropriate extension tasks that allow students to fully explore their creativity and use their skills to realise their musical potential. Music Technology is used to help students notate their compositions and experiment with different styles of music, especially dance and sample-based music. We especially encourage students, to use any instrumental skills they have, so as to encourage them to link together their instrumental lessons with our class activities.

Across all Key Stages, we encourage students to develop their vocabulary of technical musical terms and to extend their knowledge of different styles and genres as well as the techniques of composition.

## KS4 & KS5

In Key Stages 4 and 5, students are encouraged to develop their individual skills and tastes in music whilst preparing themselves for their exams.

In Key Stage 4, within Music GCSE, there is now the chance to explore aspects of Music Technology, especially recording & sequencing. Students are given specific tutorials and directed support for their composition and performance work.
