Remote Education Provision

2020 - 2021

St. Crispin's
Excellence for all

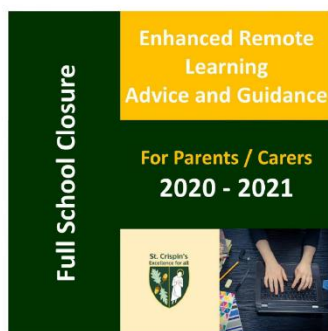

The Remote Curriculum

As a school we are committed to delivering a knowledge-rich education to all our students, with quality first teaching because we believe it is the best way to raise academic achievement and aspiration for all students. We particularly believe that a carefully considered curriculum which is coherently sequenced and well planned will enable students to develop and progress.

We have translated these same principles into our remote education provision so that we can seamlessly move between the different levels of closure that the school and students will be subjected to due to the Covid 19 pandemic, within the parameters of the virtual classroom.

Remote Teaching and provision

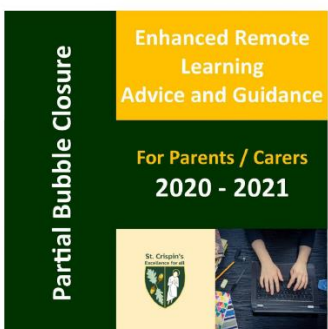

Please click on the icons below for full details of each closure which include a narrated PowerPoint to explain the different provisions.

Remote Teaching

In each of the remote learning provisions we will be using the Microsoft Teams platform. Teaching will be conducted through Teams and all resources that students will be uploaded to Teams in the relevant channels. Further details can be found in the student remote learning booklets (Please see the website for copies of these)

Students will be offered a combination of both **synchronous** and **asynchronous** teaching.

Synchronous learning is when we're all learning at the same time but in different places. A Teams lesson is a good example of a **synchronous** learning environment—we're all logged in at the same time and the teachers is talking to the students live. **Asynchronous learning** is when teachers are signposting the students to a pre-recorded lesson.

Engagement and Feedback

- ✓ We expect all students to attend the online lessons and complete the assignments set by their teachers.
- ✓ The remote learning booklets for both parents and students give some guidance of the routines which should be implemented for remote learning to be as successful as possible.
- ✓ Heads of year will be monitoring attendance daily and liaising with parents to support students in attending lessons.
- ✓ Class teachers and Heads of Department will be monitoring the quality and the completion of work and contacting parents where there are concerns.
- ✓ Parents will receive a weekly report of the work that students have submitted and work which is still outstanding. The report will also inform you of any upcoming assignments that the students have.
- ✓ Students will receive whole class feedback during lessons and will receive individual feedback on assignments, in line with the school marking policy.

Accessing Remote Education - Digital devices

As far as we are aware all students within our school community have access to a device to access their remote education. This has been achieved through the Government issued laptops and repurposing school equipment.

Parents have been sent information on how to access additional data to support the devices and we have made available internet dongles for those without access to Wi-Fi.

Parents and students can contact the school anytime if they need support with devices or software.

Through their Office 365 accounts, all students can download the Office package onto their home machines to help them complete their schoolwork. Further information on how to use this service can be found [here](#)

Students with Special Educational Needs

- ✓ We provide virtual LSA support in lessons
- ✓ With children not accessing remote learning we offer a bespoke package which is personalised to the learning difficulties of the individual student
- ✓ Small group intervention sessions are continuing virtually where possible
- ✓ We are offering a virtual lunch club
- ✓ OAKs- we are continuing with our keyworker system as well as life skills and social skills
- ✓ Students with an ECHP are entitled a space in school and should contact the SENCO Miss Sue Towler towlers@crispins.co.uk or the Deputy Headteacher Mr Railton Blyth blythr@crispins.co.uk

Further information on our remote learning provision and guidance videos can be found [here](#) on our school website.

If you have any further information about the remote learning provision offered by St Crispin's School, please contact Assistant Headteacher Mrs Kiran Sharma sharmak@crispins.co.uk
