

Year 13 Maths

What have students at St. Crispin's been taught to understand and be able to do?

Core Knowledge

Year 13- Students are taught using the Oxford University Press AQA A-Level Maths textbook.

Sequencing of learning is loosely based upon the chapters in the book. The exact order of the work is detailed in the scheme of work at the bottom of this document.

Year 13 content

Trigonometry – radians, reciprocal and inverse trig functions, compound angles, equivalent forms for $a \cos x + b \sin x$

Algebra – mathematical proof, functions, parametric equations, algebraic fractions, partial fractions

Sequences and Series – binomial series, arithmetic sequences, geometric sequences

Numerical Methods – root finding, iterative methods, the Newton-Raphson method, numerical integration

Differentiation – shapes of functions, trigonometric functions, exponential and logarithmic functions, the chain rule, the product and quotient rules, inverse functions, implicit differentiation, parametric functions

Integration – standard integrals, integration by substitution, integration by parts, integrating rational functions, differential equations

Probability – conditional probability, the normal distribution, using the normal distribution as an approximation to the binomial

Hypothesis Testing – testing correlation, testing a normal distribution

Motion in Two Dimensions – motion with constant acceleration, motion with variable acceleration, motion under gravity, motion under forces

Forces – vectors in 3D, statics, dynamics, moments

Core Skills

Students in Year 13 follow the second year of a two-year A-Level scheme of work. In Year 13 students cover approximately half of the content from the content areas: Pure Maths, Mechanics and Statistics.

Core skills students will develop are to:

- Be able to reason mathematically
- To be able to follow mathematical processes but also apply knowledge from across the curriculum and make connections between their learning
- To apply taught skills to solve functional real world mathematical problems
- To develop revision and exam techniques to prepare them for the formal A-Level assessments.

Students are pushed to develop their fluency in mathematics by having a large focus of every lesson on developing student's numeracy skills in every unit of work.

Students are also given regular feedback and teacher modelling to encourage students to be able to write meticulous, detailed, and mathematically correct solutions so that students are able to communicate mathematically.

Year 13 Maths continued

How has learning been assessed?

Students take end of chapter tests throughout the year where areas of weakness are identified and intervention with specialist intervention teachers organised.

Students also sit two full sets of papers as mock exams in the run up to their formal exams in the summer: one during the mock exam period for all subjects in January and one in class in March.

Summer exams - Paper 1, 2hrs Pure Maths. Paper 2, 2hrs Pure Maths and Mechanics. Paper 3, 2hrs Pure Maths and Statistics.

There is no set Pure Maths content per paper. All content is covered across the 3 papers.

What is coming up in the following year?

In Year 13 students finish receiving quality first teaching of the final half of content and then start a series of revision of key material from Year 12.

A-Level Scheme of Work - Year 13

AUTUMN TERM	AUTUMN TERM
12. Algebra	14. Trigonometry
13. Sequences	15. Differentiation
HALF TERM	HALF TERM
13. Sequences	15. Differentiation
17. Numerical Methods	16. Integration and Differential Equations
20. Probability and Continuous Random Variables	
SPRING TERM	SPRING TERM
Mock week—January (subject to change)	Mock week—January (subject to change)
Statistics	Mechanics
20. Probability and Continuous Random Variables	18. Motion in 2 Dimensions
21. Hypothesis Testing 1 & 2	
HALF TERM	HALF TERM
21. Hypothesis Testing 1 & 2	18. Motion in 2 Dimensions
Review and Revise	19. Forces
